

METAL CUTTING SAW FROM STEELMAX®

THE S7 METAL CUTTING SAW WITH LASER GUIDE

7" OR 7-1/4" BLADE DIAMETER

Pick up a Steelmax saw this morning, and it can pay for itself by the end of the day.

This saw is a money maker, delivering quick results in cutting metal fast, with cool, burr-free finishes. The S7's powerful 13 amp motor with overload protection provides a portable, powerful, and practical metal cutting saw.

The S7 cuts mild steel to 5/16" thickness and to a depth of 2.25", cleanly cutting channel, angles, pipe and solids. Plastics and metals including mild steel, aluminum and stainless steel are cut as easy as plywood. A laser alignment guide speeds set-up time for straight, accurate and long cuts which are cool-to-the-touch in seconds.

It takes less than 6 seconds to cleanly cut 4" x 5/16" mild steel. No milling or de-burring with near-surgical dry-cut technology.

FEATURES

- Blade guiding laser
- Unique cover collects chips and sparks
- A second blade cover is included that is vented for safe channeling of chips away from the machine, material, and user
- Includes a 7-1/4" TCT mild steel cutting blade
- Includes a carrying case, protective glasses and hearing protection, and extra carbon brushes
- Overload protection
- UL 745 certified

Steelmax S7 Technical Specifications

Cutting capacity	2-3/8" profile 3/8" solid
Weight	14 lbs
Blade diameter	7-1/4"
Arbor	20 mm
RPM	3500
Beveling/Mitering	Beveling/45°
Motor	13 amps; 120V/1500W 2.0 HP
Depth adjustment	Yes
2 Chip covers	1 cover for metal 1 cover for wood
Applications	Pipe, plate, channel, grating, roof decking, silos, emergency rescue
Part number	SM-S7
